PROFESSIONAL EXPERIENCE

Cognizant Softvision, Makati City — Software Engineer

JULY 2022 - PRESENT

Onboarded as a Senior Software Engineer. I am co-leading an agile team to deliver high quality and secured functionalities, resolve critical issues, mentoring junior and senior team members, and assisting other project members.

Developing an auditing assurance system that is used by thousands of auditors for an onshore client in the US to simplify and automate auditing processes like form creation, report generation and analytics.

Technologies used are React.js, Material UI, Node.js, Jest, Typescript, SQL, and MongoDB.

- Leading the development of an analytics functionality of the application that consists of charts and tabular data.
- Spearheading the development of the new custom form that showcases 3 sections of tabular data with complex nested tables.
- Integrating 3rd party APIs and transforming the data to the model that can be used by the application reduces coding time by 10%.
- Implementing performance enhancements that resulted in 60% improvement in application performance.
- Writing complex stored procedures to reduce service side code by 15%.
- Participating in agile ceremonies and team decision making.

Cloud Employee, Makati City — Full Stack Developer

FEB 2022 - JULY 2022

Acted as a Senior Full Stack Developer to develop a SaaS product for a UK based offshore startup company to seamlessly provide translations for applications. With over 50 different connectors that act as a bridge to the product and other applications and services. Trusted by companies worldwide to provide their translation needs and eliminate the need for manual translations. Technologies used are React.js, Node.js, GraphQL, and AWS.

- Spearheaded the implementation of Integrations functionality
